This special edition completed with other document such as :

kites practical and play pdf -

Mon, 30 Jul 2018 16:33:00 GMT - A kite is a tethered heavier-than-air craft with wing surfaces that react against the air to create lift and drag. A kite consists of wings, tethers and anchors. Kites often have a bridle and tail to guide the face of the kite so the wind can lift it. Some kite designs donâ€™t need a bridle; box kites can have a single attachment point. A kite may have fixed or moving anchors.

Kite - Wikipedia -

Wed, 08 Aug 2018 17:19:00 GMT - Kites are tethered flying objects which fly by using aerodynamic lift, requiring wind, (or towing), for generation of airflow over the lifting surfaces.. Various types of kites exist, depending on features such as material, shape, use, or operating skills required. Kites may fly in air, water, or other fluids such as gas and other liquid gaining lift through deflection of the supporting medium.
