Sat, 16 Jun 2018 13:57:00 GMT - The following example describes the short sale of a security. To profit from a decrease in the price of a security, a short seller can borrow the security and sell it expecting that it will be cheaper to repurchase in the future. When the seller decides that the time is right (or when the lender recalls the securities), the seller buys equivalent securities and returns them to the lender.
