Mon, 09 Jul 2018 11:00:00 GMT - A hallucination is a perception in the absence of external stimulus that has qualities of real perception. Hallucinations are vivid, substantial, and are perceived to be located in external objective space. They are distinguishable from several related phenomena, such as dreaming, which does not involve wakefulness; pseudohallucination, which does not mimic real perception, and is accurately ...

Tue, 10 Jul 2018 17:46:00 GMT - A paracusia, or auditory hallucination, is a form of hallucination that involves perceiving sounds without auditory stimulus.. A common form of auditory hallucination involves hearing one or more talking voices. This may be associated with psychotic disorders, and holds special significance in diagnosing these conditions. However, individuals without any psychiatric disease whatsoever may hear ...

Mon, 03 Oct 2016 06:18:00 GMT - What are hallucinogens? Hallucinogens are a diverse group of drugs that alter perception (awareness of surrounding objects and conditions), thoughts, and feelings. They cause hallucinations, or sensations and images that seem real though they are not. Hallucinogens can be found in some plants and mushrooms (or their extracts) or can be human-made.
