Sun, 08 Jul 2018 19:00:00 GMT - All individuals with a glomerular filtration rate (GFR) <60 ml/min/1.73 m<sup>2</sup> for 3 months are classified as having chronic kidney disease, irrespective of the presence or absence of kidney damage. The rationale for including these individuals is that reduction in kidney function to this level or lower represents loss of half or more of the adult level of normal kidney function, which may be ...

Mon, 09 Jul 2018 06:35:00 GMT - What is drug addiction? Addiction is defined as a chronic, relapsing brain disease that is characterized by compulsive drug seeking and use, despite harmful consequences. It is considered a brain disease because drugs change the brain; they change its structure and how it works. These brain changes can be long lasting and can lead to many harmful, often self-destructive, behaviors.
